

ACCESSORIES TO SUIT YOUR
B&D GARAGE DOOR OPENER

Accessories

Did you know you can make
your garage door and opener
even more user-friendly.

At B&D, we offer a wide range of accessories
designed to increase the functionality &
performance of your door & opener.

Many of our openers can also be linked to
interface with other electronic devices such as
home security systems.

Accessories

Call us on 13 62 63 or visit www.bnd.com.au for the complete range of B&D products and accessories.

4 BUTTON TRANSMITTER

Now everyone in the home can enjoy the
convenience of the garage door opener,
with extra 4 button transmitters available.

2 BUTTON WATER RESISTANT TRANSMITTER

The 2 button transmitter's water resistant
design, is perfect for motorcyclists,
outdoor workers who may get wet,
boat users or fishermen, etc.

ENTRY KEYPAD

Allows entry to the garage without a
transmitter. Great for children. No need to
give them a key or transmitter, they can
enter the house with their PIN number.

WALL BUTTON TRANSMITTER

Allows remote door operation. No wiring
required, and can be mounted inside the
garage.

EMERGENCY KEY RELEASE OR COMBO ACCESS DEVICE

Allows an opener to be disengaged so the
door operates manually from outside the
garage. It is recommended for use where
the garage door is the only point of entry to
the garage.

SAFETY INFRA-RED BEAMS

If you have young children or pets, the
addition of safety infra-red beams provides
added safety and security, as the door will
automatically stop and reverse, if the beam
is broken whilst the door is closing. B&D
always recommend the use of safety infra-
red beams on all automatic garage doors.

RECHARGEABLE BATTERY BACK UP

If power supply to the opener is broken,
the door will still be operational with the
rechargeable battery back up.

SOLAR POWER SYSTEM

Back up battery can be charged via solar
power to operate your garage door opener,
saving electricity and the environment.
Great for use in sheds or garages with
no electricity supply.

SECURITY SYSTEM COMPATIBLE

B&D Openers are able to be wired to
alarm systems. This allows your handheld
opener transmitter to arm and disarm
the alarm.

EXTERNAL ANTENNA

Suitable for areas that are prone to poor
reception. This item can be added to
increase the range of the transmitter.

YOUR B&D REPRESENTATIVE IS:

B&D Doors has offices servicing all states.
